

VISWANATH V

Thanjavur, Tamil Nadu | +91 63809 58798 | viswavenkat1412@gmail.com | viswavenkat1412-cloud.github.io/vportfolio/

PROFILE

Final-year Mechanical Engineering (Digital Manufacturing) Student at SASTRA University with interests in CAD design, automation, Python development and product design. I can work across both the mechanical and software domains, and I am more interested in product design and Engineering applications.

EDUCATION

B.Tech - Mechanical Engineering (Digital Manufacturing)

Sastra University, Thanjavur · 2023-2027 | CGPA: 6.12

PROJECTS

Machine Learning in Ev charging system (Group project)

Python|ML Modules

- Developed an anomaly detection system using KNN, ONE CLASS SVM and ISOLATION FOREST to analyze the anomaly in the battery while charging.
- Compared model performance on the same dataset and found the best approach for the fault detection system
- Applied predictive maintenance concepts to identify abnormal battery behavior

Quality Control chart

Python

- Developed a python application for the analysis of Statistical Process Control(SPC)
- Implemented variable and attribute control charts for manufacturing control analysis
- Automated report generation and Email notification after every analysis

TECHNICAL SKILLS

Programming: Python, OOP

Libraries: NumPy, Matplotlib, Tkinter, Pandas

Web tools: HTML, CSS

Databases: MySQL

CS Concepts: Data Structure & Algorithm

Engineering: Solidworks, Creo, AutoCAD

Machine Learning: Scikit-learn

Tools: GitHub

INTERNSHIP & EXPERIENCE

Schneider Prototyping

Internship

- Gained practical exposure to prototyping and product development processes.
- Worked with manufacturing and engineering concepts related to prototype development.

CSWA (Certified SolidWorks Associate)

Training

- Practiced part modeling in SolidWorks, building components from sketches to finished features.
- Created multi-part assemblies, applying mates and constraints to model complete mechanisms.

CERTIFICATIONS

- Certified SolidWorks Associate (CSWA) — Dassault Systems, 2025

- Python – Live Wire, 2025

ACHIEVEMENTS

- Machine Learning project for EV battery anomaly detection
- Developed a Python-based automation project

DECLARATION

I hereby declare that the information given above is true and correct to the best of my knowledge and belief.
